| U UTILITY

The Flyer® 72 - Utility (F72-U) is an internally transportable open cargo deck vehicle that is capable of supporting multiple mission kits. The F72-U shares the same based design (90% component commonality) with our Flyer 72-Heavy Duty and Flyer 72-Light Duty variants. The F72-U can be used as a kit modification for either vehicle.

With a payload capacity of 6,000 lbs. (>2,700 kg) the F72-U retains the same mobility, maneuverability and reliability of the Flyer 72-Heavy Duty. Like all our Flyer 72 variants, the F72-U is built to reliably operate in severe, rugged, and restrictive terrain, in all weather conditions.

The F72-U's open cargo deck (69" wide X 83" long), combined with below deck and external storage compartments, provides 102 cubic feet of cargo space - an unprecedented payload volume for this class of vehicle.

- ◆ **Unprecedented Payload Volume**
- ◆ **Configurable for Multiple Mission Kits**
- ◆ **Highly Modular and Adaptable Platform**
